-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. Figure 4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: a listing of prior art documents is not required in the specification, the examiner suggests removing the list found on page 2 lines 9-12.

Appropriate correction is required.

Claim Objections

4. Claims 3 and 4 are objected to because of the following informalities: line 4 of both claims recites "a crankpin" should be - - the crankpin - -. Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Kouji, JP5901914.

Kouji discloses a lubrication system for a crankshaft comprising:

- A crankpin (32) attached to a crank web (31) integrally provided with a journal portion (27) to form said crankshaft (26)
- A roller bearing (33) mounted on an end portion of said connecting rod (34) and fitted to said crankpin (32)
- A lubricating-oil discharge opening (65) communicating with a lubricating-oil supply path (56) formed in said crankshaft (26), said opening (65) being formed on an end face of said crank web (31)
- Wherein the lubrication oil is discharged from said opening (65) to an end portion of said bearing (33, see Figure 6)
- Wherein said crankshaft (26) is formed by a plurality of shaft elements (left and right of connecting rod 34) each having a journal portion (27 and 28) and a crank web (30 and 31) integrally formed therewith; and the crankpin (32) connects the shaft elements by an attachment hole (where pin 32 is located) formed in each of the crank webs (30 and 31)

Conclusion
